

Simeon Talkback

it's your turn to talk

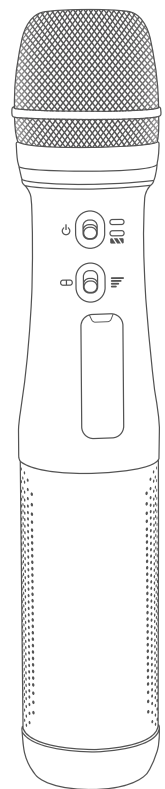

SO SIMPLE TO USE

Imagine an all-in-one mini sound system so compact you can hold it in your hand and pass it around. That's Talkback! – a simple 'talking stick' concept that combines a microphone, amplifier and speakers all in a single handheld unit. No cables, no cumbersome speakers, just instant amplification when and where you need it.

Talkback is ideal for small group meetings, kindergarten circle time; anywhere voice reinforcement is needed, instantly.

ALL-IN-ONE

With two built-in mini panel speakers to distribute sound, Talkback requires no other external devices. Just pass and talk. But you can also use it with optional accessories, including a headset mic for hands-free use, or use it as a speaker for your tablet or phone. Talkback is fully rechargeable and gives up to 6 hours of talk time. Thanks to Talkback everyone gets their turn to talk.
